SUMMARY

Full Stack Developer with over 4+ years of experience designing and developing scalable, high-performance web applications from concept to deployment. Proficient in building responsive frontend interfaces with React.js and Next.js while developing secure backend services using Node.js, Express.js, TypeScript, and MongoDB. Experienced in designing RESTful APIs, implementing authentication and authorization, integrating AI-powered solutions, and collaborating with cross-functional teams to deliver modern SaaS and enterprise applications. Passionate about writing clean, maintainable code and building secure, user-focused digital products.

SKILLS

Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3

Tools

Git, GitHub, Vercel, Postman, Figma

Backend

Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Frontend

React.js, Next.js, ReactNative Redux Toolkit, Tailwind CSS, React Query, React Hook Form, Material UI, Responsive Design, Bootstrap, Context API, REST APIs, Fetch API, Jest, React Testing Library,

Database

MongoDB, PostgreSQL, MySQL

PROFESSIONAL EXPERIENCE

3pcon Technology & Digital

Full Stack Developer - (Contract)

05/2026 – Present

Nigeria | Canada

- Developed scalable web applications that supported clients' digital transformation initiatives, delivering end-to-end solutions across frontend and backend technologies.
- Integrated AI-powered capabilities and third-party services to automate business workflows and enhance user experiences.
- Optimized application performance, database interactions, and API efficiency while maintaining high standards of security, scalability, and code quality.
- Participated in architecture planning, testing, deployment, and continuous product enhancement throughout the software development lifecycle.

Map of PI

Full Stack Engineer - (Full Time)

01/2024 – 04/2026

United States

- Contributed to the development of a location-based platform that enables Pi Network users to discover merchants, businesses, and services that accept Pi as payment.
- Designed and implemented responsive user interfaces while developing backend integrations that powered business discovery, user interactions, and location-based services.
- Built reusable frontend components, integrated RESTful APIs, and collaborated on scalable backend functionality to deliver a seamless cross-platform experience.
- Optimized application performance and improved maintainability through modern development practices, code reviews, and continuous product enhancements.

Simxchanger

Web Developer - (Contract)

11/2022 – 12/2023

Nigeria

- Built responsive, high-performance user interfaces that streamlined the exchange process, account management, and transaction workflows across desktop and mobile devices.
- Collaborated with product designers and backend engineers to implement secure API integrations, real-time data updates, and user-focused features that enhanced platform reliability.

Web Developer

Mostly involved with frontend technologies such as Javascript, React.js, Angular, Vue.js, HTML5, CSS/SCSS, and more. I help influence decisions around the Eclipsoft frontend design system, frontend technologies, and accessibility. I collaborated with the back-end team to integrate with RESTful APIs and ensured seamless communication between the front-end and back-end.

EDUCATION

Higher National Diploma (HND) in Computer Science

Federal Polytechnic Offa

03/2023 – 11/2024
Kwara State, Nigeria

PROJECTS

Proptiz

Digital Real Estate Platform

Designed and developed a web 3 integrated scalable real estate platform that enables users to discover, explore, rent and invest in properties across Africa and beyond through an intuitive digital experience. Engineered responsive user interfaces, reusable component architecture, advanced property search and filtering, interactive maps, and secure API integrations while optimizing performance, accessibility, and scalability to support a growing user base.

SecureCloud

Enterprise-grade file storage, guarded by a real-time SOC.

Designed and developed an enterprise-grade cloud security platform that protects web applications through real-time threat detection, multi-layer intrusion prevention, and centralized security log management. Implemented intelligent security controls including rate limiting, IP reputation analysis, anomaly detection, request validation, and automated threat response, while providing administrators with real-time monitoring dashboards, attack analytics, Geo-IP visualization, and comprehensive audit logs to strengthen application security and operational visibility.

AI-Powered Inventory Management System

Designed and developed an intelligent inventory management platform that leverages AI to streamline inventory operations, optimize stock management, and provide actionable business insights. Built responsive dashboards, real-time inventory tracking, analytics, and AI-assisted features for demand forecasting, stock recommendations, and automated reporting, delivering an intuitive user experience while improving operational efficiency and decision-making.

CERTIFICATES

- Outskill - Generative Ai Mastermind
- Unesco - Youth Hackathon 2025
- HP Life - Agile Project Management
